“A” Series Center Latch Elevators TA-35, TA-65, TA-100, TA-150

Purpose: Center Latch Collar Elevators provides superior handling of collar-type drill pipe, casing and tubing.

Special features: Proper balance for easier handling; latch and safety latch lock combination; operator safety features.

Safety features include guarded operating handles to help prevent accidents to operators and an extra handle at the rear of the elevator for easier, safer operation. All Type A elevators are equipped with a latch and safety latch lock combination.

All Elevators are made from alloy steel, heat treated and magnetic particle inspected. All steel specifications are certified.

“G” Series 18° Center Latch Elevators Type MG / RG / MGG / GG

Purpose: Center Latch Collar Elevators for handling 18° external upset drill pipe and tubing. Similar in design and construction to the A-Series, except they are bored to fit the contour of 18° type drill pipe and tubing.

Special features: Proper balance for easier handling; latch and safety latch lock combination; operator safety features.

Safety features include guarded operating handles to help prevent accidents to operators and an extra handle at the rear of the elevator for easier, safer operation. All Type A elevators are equipped with a latch and safety latch lock combination.

All Elevators are made from alloy steel, heat treated and magnetic particle inspected. All steel specifications are certified.

Solid & Plate Type Sucker Rod Elevator

Rod Elevators available to handle rod sizes from 1/2" through 1-1/8". Elevator assemblies use a spring loaded latch and the rod can only be released by the operator. The bail and body is made from alloy steel and heat treated for maximum strength and durability. All steel specifications are certified and rod elevator is rated at 20 ton capacity.

Cat. #	Rod Size	Wt. Lbs. Ea.
